- Blog Post Link : <https://blog.sitm.ac.in/webinar- Skill Development - with A-step-before-your-first-step/amp/>
- Webinar for Semester -1/2/3/4 : 3

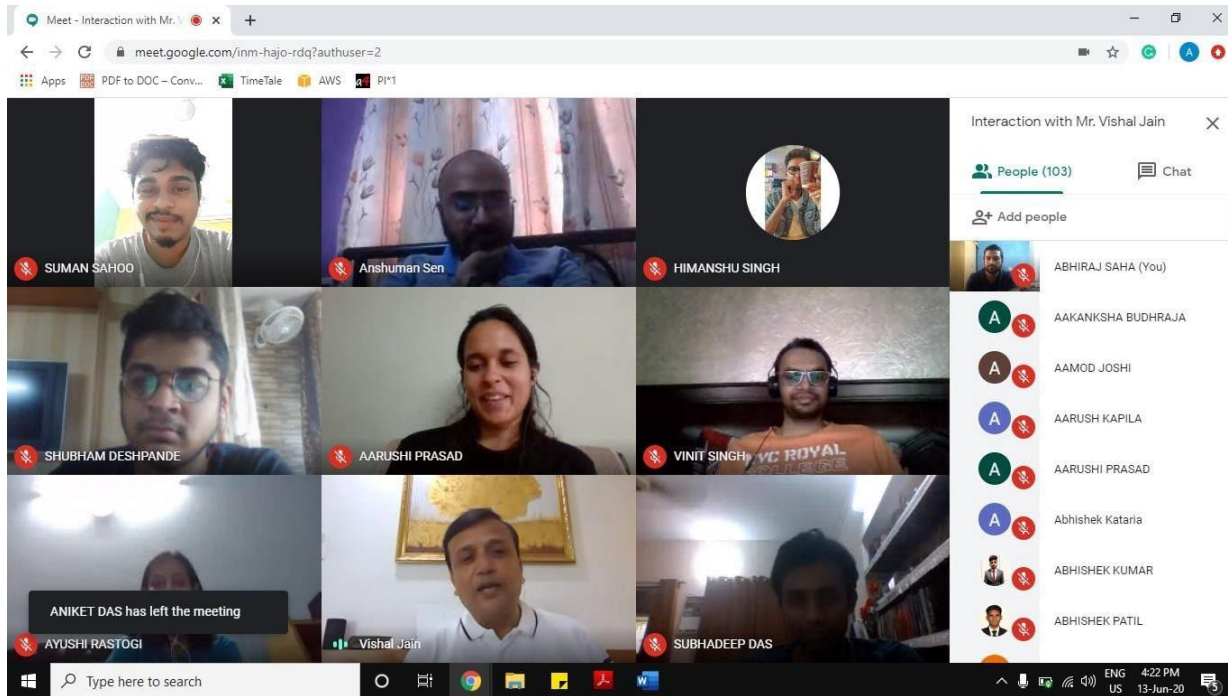

The Alumni Relations Committee of Symbiosis Institute of Digital and Telecom Management held an interactive session with one of our star alumni, Mr. Vishal Jain, Partner & Digital Risk Leader at Deloitte India. He has more than 15 years of experience in the field of risk advisory in the technology sector. Mr. Vishal Jain specializes in telecom technologies, digital risk, crisis management, data privacy, business resilience, and cybersecurity. He worked for 15 years in EY in the field of cybersecurity and data privacy before his current preoccupation.

Digital Enablers, A solution to all problems?

The topic of the interactive session with Mr. Jain was **a step before your first step**. Mr. Jain firstly addressed the key ongoing issues in these days of coronavirus pandemic, unemployment, and economic crisis. Mr. Jain with his staggering experience asserted that the coronavirus has brought a huge change in the balance of the corporate world. The wave of digital transformation has started to ascend upon industries. All industries, whether be it an ICT or an FMCG industry, are witnessing a huge change in the culture, as well as infrastructure.

Digital and Telecom have become the underlying base layer which are business enablers. It's time for industries and organizations to use digital tools and solutions to their advantage. According to Mr. Jain, integration of an organization's current business model with digital enablers will open doors to new business opportunities and innovation. Even though coronavirus pandemic has slowed down industries, but using digital infrastructure will certainly help industries and organizations to bounce back and get back in the corporate hemisphere
