1	Induction Program with Online Pre-Induction Portal and Program with Domain and life skill and Motivation orientation

Best Practice 1:Title: Induction Program with Online Pre-Induction Portal and Program with Domain and life skill and Motivation orientation

1) Objectives of the Practice: Orientation of Students during Induction to understand value systems. Both formal about domain and informal with life skill and Motivation orientation for holistic development.

2) The Context: SITM has offered an (i) online pre-induction program to all students. This was accompanied by sessions from faculty members as a part of pre-induction. It helped students to overcome issues related to various courses taught in this program. (ii) SITM has also offered an induction program that consists of sessions from industry experts, entrepreneurs, alumni, etc. The most important feature is a discussion on life skills, motivation, management lessons from Bhagwat Gita which helped students to have an overall view of the management program. It also included an outbound program of one day which helped students to interact with each other and learn management lessons such as leadership, coordination, and planning.

3) The Practice: (i) About Pre-Induction -Telecom management has a spread of several subjects from the domains of technology, finance, and marketing fall under its overarching umbrella. Hence, this write-up is for students for learning about the B-school and bridge the knowledge and expectation for the threshold all students should reach, before the actual instructions start. (ii) Induction comprises of holistic learning with Alumni, Consultants, CEO, and similar thought leaders influencing student learning. And on the personality side, the motivational, team building, and other programs are lined up to gear up the students upon entry. The most important feature is a discussion on life skills, motivation, management lessons from Bhagwat Gita which helped students to have an overall view of the management program. It also included an outbound program of one day which helped students to interact with each other and learn management lessons such as leadership, coordination, and planning.

4) Evidence of Success: Induction feedback has been good. And the team, the academic committee, strives to make the experience better. Refer Proof as feedback with satisfied response.

5) Problems Encountered: Planning has a major role to play with the budget to aid. The budget is critical. Planning is such that recruiters take cognizance of the batch as well as the students learn. And execution at run time is student-managed so extra care during a briefing

6) Resources Required: (i) Online portal launching with zero errors so need deployment and testing done in time with budget as an extremely useful tool and (ii) Budget, planning and team involvement, Guest management by corporate team, mementos, luncheon arrangement to keep the guest happy and team coordination with students

Best Practice 1: (Proof)

Monday, June 8th, 2015		COMMON INDUCTION SIU	
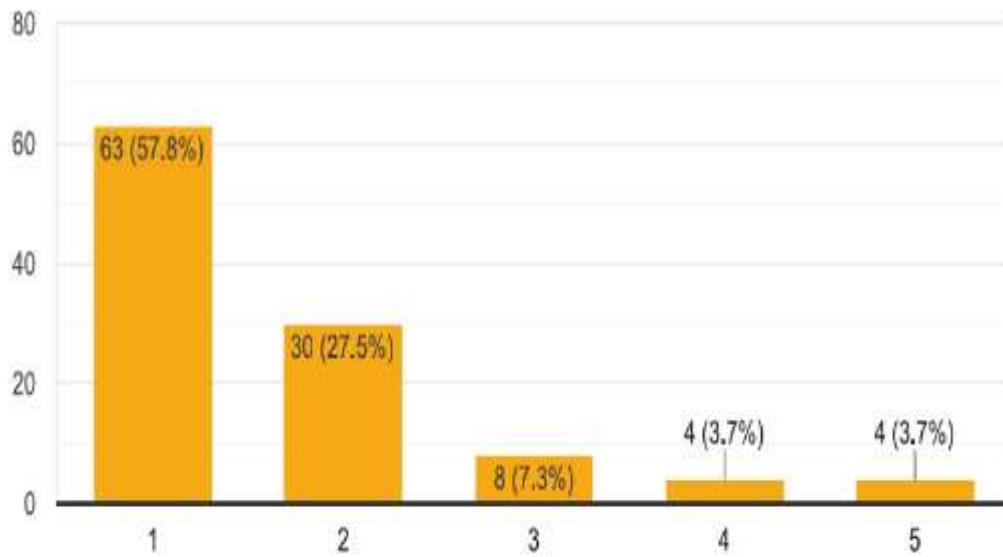

Figure 1: Induction Satisfaction Index

(1: Extremely Satisfied, 2: Satisfied 3: Good & Neutral, 4: Slightly unsatisfied, 5: Not satisfied

Speakers - Mr. Mahesh Jangale & Mr. Pravin Ujegar (Neoperts Business Solutions Pvt. Ltd.) -Topic – NLP (Neuro Linguistic Programming) and the CMW (Create the Master Within) -A Workshop

Speaker - Mr. Apurva Mankad (Founder and CEO, WebXpress)
Topic - The future of Indian MBA in Cloud First, Mobile First world

PreInduction Portal

2	Innovation in learning – TBR Newsletter

1.1 Best Practice #2- Title: Innovation in learning -TBR Newsletter

1) Objectives of the Practice: This activity is completely driven by students for the benefit of students. The purpose of this is to enhance students' knowledge and build a knowledge base of SITM. It follows the principle of "Think, Innovate and Write".

2) The Context: SITM publishes TBR Journal every year. Now, this activity is extended as students' level where the Students write and publish TBR Newsletter which is used internally by all the students to enhance their knowledge.

3) The Practice: SITM has formed a student's team under the guidance of faculty in charge. The students' Team asks a few questions related to technology and commercial aspects of it to all students. The students answer them and the same is reviewed and compiled by the Team and it is published to all students for knowledge enrichment. Telecom being a niche domain, this exercise helps all students to learn various aspects of technology, upcoming trends along with its analysis.

4) The success of Evidence: This activity was initiated in August 2015 on a pilot basis however now it has gained popularity amongst the students. The topics covered are current in the industry such as Green telecom infrastructure, SDN and NFV, etc.

5) Problems encountered: It is a slow learning process and the quality needs to be maintained are the two challenges.

6) Resources Required: Learning software, editing software for research, and databases from the library resources.

8) Best Practice 1: (Proof no 1)

Hello Everyone,

Greetings from Telecom Business Review Team !

Today's topic is "Green Telecom Infrastructure".

Try to answer the following

    1. The need for Green Telecom Infrastucutre ?
    2. Benefits of Green Telecom Infrastucutre ?
    3. Where it has been successfully implemented in India ?

If you weren't able to answer the above questions, you know the drill.

We are open to suggestions and if any topics you want us to discuss, write us on tbrnewsletter@sitm.ac.in

All the previous articles have been listed on http://telecomcrosstalk.blogspot.in
You can post your comments or doubts on respective articles there, we will be happy to answer them

Hello batch,

Greetings from Telecom Business Review!

Institutions facing losses from financial crimes are growing rapidly. Fraudsters keep innovating and beating the system. This calls for a solution where technological advancements have to be leveraged to beat the fraudster and allow early identification of their modus operandi.

Fraud Detection and Prevention Market to grow from USD 3.4 billion in 2018 to USD 63.5 billion by 2025, at a CAGR of 26.7% during 2018-2025.
