

Workshop 7

Year	Batch (21-23)
Topic name of the guest lecture	Securing organizations data - tools and technology
Speaker Name	Mr. Ankur Tyagi
Number of Participants	124
Date	12/09/2022

The Activity report:

The lecture began with an introduction to the importance of securing organizational data, highlighting the potential risks and consequences of data breaches. Sir, then discussed the various threats that organizations face, including cyber attacks, data theft, and unauthorized access.

Next, sir provided an overview of the various tools and technologies that can be used to secure organizational data. This included firewalls, antivirus software, encryption software, intrusion detection systems, and access control systems. The students were given an in-depth understanding of each of these tools, their benefits, and how they can be used to protect sensitive data.

The lecture also included case studies of organizations that had implemented effective data security measures and the benefits they had achieved. This helped the students to understand the practical application of the concepts discussed in the lecture.
