

## Workshop 20

### Healthcare and Pharma

#### ADDRESSED by Mr. Dhaval Mehta

During the corporate interaction, several important points were highlighted. Firstly, individuals should be prepared for unforeseen challenges and setbacks in life. It was also advised to avoid engaging in cancel culture and instead promote open-mindedness. Presenting oneself best was emphasized as a key aspect of personal and professional success. The significance of remaining open to opportunities, regardless of one's current situation, was stressed. Comparisons with others were discouraged as they can diminish personal fulfilment. Avoiding extreme or unethical methods to progress in life and focusing on individual growth was recommended. Setting broad goals that encourage continuous learning was preferred over overly specific ones. The importance of maintaining relevance by constantly improving and growing was emphasized. The lecture aimed to inspire individuals to overcome difficulties, embrace positivity, exhibit their best selves, seize opportunities, avoid comparisons, focus on personal growth, and adapt to a changing world.
